WHAT IS THIS PRODUCT?

TYPE

Carmignac Absolute Return Europe is a French common fund (Fonds Commun de Placement – FCP), governed by European Directive 2009/65/EC (UCITS)

TERM

The fund was launched on 21 January 1997 for a period of 99 years, except in the cases of early dissolution or extension.

OBJECTIVE

The fund aims to achieve net positive performance over the recommended investment horizon of three years.

The fund pursues a long/short strategy focused on fundamentals and aimed at creating a portfolio of long and short positions in financial instruments eligible for the fund's net assets. At least 75% of the fund's net assets is invested in shares of small, mid and large-cap companies in the European Economic Area, while the remainder may be invested in shares of issuers located outside the European Economic Area. Systematic hedging (especially of PEA-eligible stocks) limits equity exposure to 50% of the fund's net assets. The fund may take short positions on underlying assets eligible for the fund to pursue relative value strategies aimed at taking advantage of the relative value between different instruments. The resultant net equity exposure may vary from -20% to +50% of the fund's net assets. The Fund may also have up to 25% of its net assets invested in bonds, treasury bills and money market instruments traded on French and foreign markets which the portfolio manager believes have the best upside potential or can reduce the portfolio's risk. Up to 25% of the Fund's net assets is exposed to currency risk through the purchase of securities denominated in currencies other than those of the European Economic Area.

The derivatives liable to be used by the portfolio manager include options (vanilla, barrier, binary), futures, forwards, forward exchange contracts, swaps (including performance swaps), and CFDs (contracts for difference), involving one or more risks/underlying instruments in which the portfolio manager may invest. The amounts invested in securities with embedded derivatives, excluding contingent convertible and callable/puttable bonds, may not exceed 10% of the net assets. The portfolio manager may invest up to 10% of the net assets in contingent convertible bonds ("CoCos").

The fund has no reference indicator.

WHAT HAPPENS IF CARMIGNAC GESTION IS UNABLE TO PAY OUT?

The fund is a co-ownership of financial instruments and deposits separate from the management company. In the event of the latter's default, the product's assets held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the fund.

There is no compensation or guarantee system in place that would fully or partially offset this loss.

Redemptions are possible each business day. In exceptional circumstances, your right to request the redemption of your investment may be suspended.
