# CARMIGNAC COURT TERME 2022 ANNUAL REPORT

## Main features of the Fund

### Classification

Short-term variable net asset value (VNAV) money market fund.

### Allocation of distributable income

Distributable income	“Acc” units
Allocation of net income	Accumulation (dividends are recorded on an accruals basis)
Allocation of net realised capital gains or losses	Accumulation (dividends are recorded on an accruals basis)

### Countries in which the Fund is authorised for distribution

A EUR ACC units: Austria, Belgium, Switzerland, Germany, Spain, France, Italy, Luxembourg, Netherlands and Singapore.

### Investment objective

The investment objective of the fund is, over a minimum investment horizon of one day, to outperform the Eurozone money market reference indicator (compounded €STER), less actual management fees, by investing in securities of issuers that integrate environmental, social and sustainability criteria into their operating methods.

However, in the event of negative or very low money market interest rates, the returns generated by the Fund may be insufficient to cover the management fees, resulting in a structural reduction in the Fund’s net asset value.

### Reference indicator

The reference indicator is the compounded €STER (Bloomberg code: ESTRON).

The €STER is an interbank interest rate benchmark. In accordance with the methodology used by the European Central Bank (ECB), it is published at 8.00 am, on the basis of transactions made the day before, from Monday to Friday excluding public holidays. The €STER is based on unsecured overnight interest rates for lending between banks. These interest rates are obtained directly by the ECB as part of the collection of statistical data on the money market.

For more information about the index, please see <https://www.ecb.europa.eu>

The management company may replace the reference indicator if one or more of the indices that make up this reference indicator undergo substantial modifications or cease to be published.

This fund is an actively managed UCITS. An actively managed UCITS is one where the investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. The fund's investment universe is at least partly derived from the indicator. The fund's investment strategy is not dependent on the reference indicator. Therefore, the fund's holdings and the weightings may substantially deviate from the composition of the indicator. There is no limit set on the level of such deviation.

## Investment strategy

### STRATEGIES USED

#### Investment process:

The investment process is the result of a top-down approach and can be divided into four stages, the third being extra-financial analysis.

#### 1. Macroeconomic analysis and market forecasts

The management team holds a committee meeting every month to analyse:

- Macroeconomic developments in the major geographical areas (United States, Europe, etc.)
- The monetary policies of the main central banks (Fed, ECB)
- The money market instruments of the central banks: outstanding liquidity, reserve requirements, auctions, etc.

This analysis helps to determine the central interest rate scenario and the asset allocation to be implemented within the portfolios.

#### 2. Tactical asset allocation by instrument type

- Separation into fixed- and/or floating-rate instruments
- Selection of maturities: at least 7.5% of net assets in securities that mature within one day and at least 15% of net assets in securities that mature within one week (including up to 7.5% of net assets in securities that can be sold and liquidated within five working days).

#### 3. Selection of sectors and issuers

Sectors and issuers (public and private) are selected based on non-financial analysis and financial stability criteria:

- Financial analysis: Issuers are selected based on recommendations from financial analysts specialising in credit risk.
- Extra-financial analysis: Extra-financial research is based on recommendations from analysts specialising in environmental, social and governance criteria.

#### 4. Selection of securities and yield curve positioning

After a list of authorised issuers has been drawn up, the management team selects securities based on their:

- Liquidity
- Profitability
- Credit quality
- Modified duration

#### Interest rate risk, credit risk:

In terms of interest rate risk, the weighted average maturity (WAM) of the portfolio is limited to 60 days.

WAM is the average duration until maturity of all the securities held by the Fund, adjusted to reflect the relative weighting of each security, considering that the maturity of an adjustable-rate security is the time remaining until the money market rate is next adjusted, rather than the time remaining until repayment of the principal on the security.

Derivatives will be taken into account when calculating the WAM.

In terms of credit risk, the weighted average life (WAL) of the portfolio is limited to 120 days. WAL is the weighted average of the residual lives of each security held by the Fund, i.e. the time remaining until the principal on the security is repaid in full.

Socially responsible investment:

Socially responsible investment (SRI) means integrating non-financial criteria into the selection and evaluation of securities.

These non-financial criteria cover environmental (E), social (S) and governance (G) factors: Environmental: (for example: the calculation of the carbon footprint and the development of a programme for renewable energies; social factors include diversity and employee turnover rate; and governance factors include the independence of the board of directors and the separation of chair and chief executive functions – as defined by the Investment Manager’s extra-financial research conducted prior to the financial analysis – and are selected using an evaluation model that combines quantitative and qualitative analysis.

This Fund adopts a best-in-class SRI approach that aims to identify the leading issuers in each sector (for companies) or each geographical area (for governments) based on the ESG criteria identified by the team of SRI analysts. This analysis is tailored to the key issues of each issuer category.

The method used to select the issuers is determined as follows:

The Investment Manager has drawn up a list of issuers with the best ESG practices. The companies, governments and supranational bodies are analysed individually by a dedicated team of ESG/SRI analysts using internal ESG indicators, and are then compared with others in their sector (for companies) or geographical area (for governments). The issuers demonstrating best practices are eligible for the portfolio (best-in-class approach). Conversely, the companies displaying the worst ESG practices within each sector are excluded (those in the bottom three deciles on a scale of 1 to 10).

The criteria used to analyse companies, for example, are:

- Environmental: global warming and combating greenhouse gas emissions, energy efficiency, conservation of natural resources
- Social: management of jobs and restructuring, workplace accidents, training policy, remuneration
- Corporate governance: the independence of the board of directors from the general management, respecting the rights of minority shareholders, separating the management and control functions, fighting corruption

For governments, the first filter is that of responsibility indicators, which aim to ensure compliance with ethical criteria:

- Respect for human rights (discrimination and rights of minorities, national immigrant integration policies)
- Biodiversity (percentage of protected areas)
- Healthcare (access to and coverage of healthcare systems, inequality and life expectancy)

The ESG analysis that follows this initial filter is based on indicators such as:

- Environmental: energy efficiency, water (protection of water resources), pollution (air, water, waste)
- Social: equal rights and anti-discrimination, workplace equality, access to education, care services for ageing populations
- Institutional governance: civil rights, transparency and anti-corruption, freedom of the press, independence of the justice system

## Description of asset categories and financial contracts as well as their contribution to the investment objective being achieved

### EQUITIES

None.

### DEBT SECURITIES AND MONEY MARKET INSTRUMENTS

The securities in which the Fund can invest have (i) a legal maturity at issuance of 397 days or fewer, or (ii) a residual maturity of 397 days or fewer.

The Fund invests primarily in fixed- and/or variable- and/or adjustable-rate euro-denominated money market instruments. The Fund invests in securities from public issuers, whether or not they are guaranteed by a sovereign state, as well as in securities from private issuers.

The Fund may invest in short- and medium-term transferable securities (including negotiable European medium-term notes (NEU MTNs), euro commercial paper and negotiable European commercial paper (NEU CP) and treasury bills.

As the Fund is managed on a discretionary basis, no asset allocation constraints shall apply.

Pursuant to the derogating provisions of Article 17(7) of Regulation (EU) 2017/1131 and in compliance with the principle of risk spreading, the Fund may invest more than 5% and up to 100% of its assets (20% for issuers in emerging countries) in different money market instruments issued or guaranteed separately or jointly by administrations, institutions or organisations.

The authorised issuers included under the derogating provisions of Article 17(7) of Regulation (EU) 2017/1131 are as follows:

- The European Union
- National administrations (countries or state agencies, e.g. Republic of Singapore or the Caisse d'amortissement de la dette sociale – CADES), regional administrations (e.g. the 18 regions or 101 departments of France) or local administrations (e.g. the Société du Grand Paris, Rennes Métropole but also the City of Stockholm and the City of Turin) of the Member States or their central banks,
- The European Central Bank, the European Investment Bank, the European Investment Fund, the European Stability Mechanism, the European Financial Stability Facility
- A central authority or central bank of a third country (including Norway, Switzerland, Canada, Japan, Australia and the United States) such as the US Federal Reserve (Fed)
- The International Monetary Fund, the International Bank for Reconstruction and Development, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Bank for International Settlements

The fund may invest up to 20% of its net assets in securities issued by companies whose registered office is located in an emerging country (defined as a country that is not a member of the OECD).

All these securities must meet the socially responsible investment (SRI) selection criteria.

The securities held by the Fund will all be of high quality. The Investment Manager will ensure that this is the case thanks to an internal assessment process that takes into account in particular the credit quality of the instrument, the nature of the asset class, the rating and the liquidity profile. In the event of a deterioration in the quality of a money market instrument, the security or securities concerned will be sold under the best possible conditions in the interests of the unitholders. Any operating and counterparty risks inherent to the structure of the investment are subject to the Investment Manager's own evaluation process.

The Investment Manager will carry out its own analysis of the risk/reward profile of the securities (return, credit rating, liquidity, maturity). As a result, the decision to buy, hold or sell a security (particularly where the rating has changed) is not solely based on the rating criteria, but also reflects an internal analysis of the credit risks and market conditions carried out by the management company.

#### **SHORT-TERM MONEY MARKET FUNDS**

In compliance with Regulation (EU) 2017/1131, the Fund may invest up to 9.99% of its net assets in units or shares of short-term money market UCITS under French or EU law.

The Fund may invest in eligible UCIs managed by BNP PARIBAS ASSET MANAGEMENT (France) or an affiliated company.

#### **DERIVATIVES**

The Fund may intervene in regulated and/or over-the-counter French and/or foreign futures markets authorised by the Decree of 6 September 1989 and its amendments (for financial instrument contracts only).

On these markets, the Fund may deal in the following products: interest rate swaps.

All these instruments may be used to hedge the portfolio against interest rate risk. They are entered into with counterparties selected by the Investment Manager, and these may be linked to the BNP Paribas Group. The eligible counterparty or counterparties have no power over the composition or management of the Fund's portfolio.

The Fund may not use total return swaps.

#### **SECURITIES WITH EMBEDDED DERIVATIVES**

In order to achieve its investment objective, the Fund may also invest up to 100% of its net assets in financial instruments with the following embedded derivatives: puttable securities for the purpose of reducing the portfolio's WAL, subject to compliance with the conditions set out in Regulation (EU) 2017/1131.

#### **DEPOSITS AND CASH**

In order to achieve its investment objective or optimise its treasury management, the Fund may deposit up to 100% of its net assets with one or more credit institutions.

Cash lending is prohibited.

#### **CASH BORROWING**

None.

However, in the event of exceptional redemptions, the Fund may temporarily acquire debtor status without this being the result of a management act. The debtor position will be redressed as soon as possible and in unitholders' best interests.

#### **TEMPORARY PURCHASE AND SALE OF SECURITIES**

For the purpose of effective portfolio management and adhering to its investment objectives, the Fund may use reverse repurchase agreements up to a limit of 100% of its net assets and repurchase agreements up to a limit of 10% of its net assets. These trades are made to optimise the Fund's income, invest its cash, adjust the portfolio to changes in the assets under management, or implement the strategies described above.

These transactions will be concluded with counterparties selected by the Investment Manager from among institutions with their registered office in a member state of the OECD or the European Union mentioned in Article R.214-19 of the French Monetary and Financial Code.

They may be carried out with companies associated with the BNP Paribas Group. The counterparties must be of high credit quality.

Within the scope of these transactions, the Fund may receive/give financial guarantees (collateral); the section entitled “Collateral management” contains information on how these work and on their characteristics.

Additional information on fees linked to such transactions appears under the heading “Fees and expenses”.

## Contracts constituting financial guarantees

In order to guard against counterparty default, the temporary purchase and sale of securities, as well as transactions on derivatives traded over the counter, may give rise to the delivery of collateral in the form of securities and/or cash which are held in segregated accounts by the custodian.

The eligibility of securities received as collateral is defined in accordance with the investment restrictions and based on a discount procedure established by the Investment Manager’s risk management department. Securities received as collateral must be liquid and able to be sold quickly on the market. Securities received from a single issuer may not exceed 20% of the Fund’s net assets (except for securities issued or guaranteed by an eligible OECD Member State, for which this limit may be increased to 100% provided that this is divided between six issues, none of which may represent more than 30% of the Fund’s net assets) in accordance with the conditions set out in applicable regulations. They must be issued by an entity other than the counterparty.

Assets
<b>Cash (EUR)</b>
<b>Fixed income securities</b>
Securities issued or guaranteed by a government of one of the eligible OECD countries. The Fund may receive as collateral, for more than 20% of its net assets, securities issued or guaranteed by an eligible OECD Member State. As such, the Fund may be fully guaranteed by securities issued or guaranteed by a single eligible OECD Member State.
Supranational securities and securities issued by government agencies.
Debt securities and bonds issued by private issuers.
Money market instruments issued by private issuers.
Units or shares of money market UCITS (1).

(1) Only UCITS managed by BNP PARIBAS ASSET MANAGEMENT Holding Group companies.

Non-cash collateral must not be sold, reinvested or pledged and is kept in a segregated account with the custodian.

Cash collateral received may be reinvested in accordance with AMF position 2013-06. This means cash received may be placed on deposits, invested in high-quality government bonds, used in reverse repurchase agreements or invested in short-term money market UCITS.

For repurchase and reverse repurchase agreements, the Fund also complies with the provisions set out in Articles 14 and 15 of Regulation (EU) 2017/1131, in particular:

- The cash received may be placed on deposits or invested in money market instruments issued or guaranteed in accordance with the terms and conditions set out in Article 15(6) of Regulation (EU) 2017/1131
- The assets received may not be sold, reinvested, pledged or otherwise transferred
- The assets received are sufficiently diversified with a maximum exposure to a given issuer of 15% of the Fund’s net assets

## Risk profile

The Fund invests in financial instruments and, where applicable, UCIs selected by the Investment Manager. The performance of these financial instruments and funds depends on the evolution and fluctuations of the market.

The risk factors described below are not exhaustive. It is up to each investor to analyse the risk associated with such an investment and to form his/her own opinion independent of Carmignac Gestion, where necessary seeking the opinion of any advisers specialised in such matters in order to ensure that this investment is appropriate in relation to his/her financial situation.

**a) Risk associated with discretionary management:** the discretionary management style is based on expectations regarding the performance of different markets in the investment universe. There is a risk that the Fund might not be invested in the best-performing markets at all times.

**b) Interest rate risk:** interest rate risk is the risk that the net asset value may fall in the event of a change in interest rates. When the modified duration of the portfolio is positive, a rise in interest rates may lead to a reduction in the value of the portfolio. When the modified duration of the portfolio is negative, a fall in interest rates may lead to a reduction in the value of the portfolio.

**c) Credit risk:** credit risk is the risk that the issuer may default. Should the quality of issuers decline, for example in the event of a downgrade in their rating by the financial rating agencies, the value of the bonds may drop and lead to a fall in the Fund's net asset value.

**d) Risk of capital loss:** the Fund is managed on a discretionary basis and does not guarantee or protect the capital invested. Capital loss occurs when a unit is sold at a lower price than that paid at the time of purchase.

**e) Counterparty risk:** counterparty risk arises from all the OTC financial contracts concluded with a single counterparty, such as temporary purchases/sales of securities and any other derivative contract concluded over the counter. Counterparty risk measures the risk of loss incurred by the Fund due to a counterparty in a transaction defaulting on its obligations before the definitive settlement of the transaction via financial flows. In order to reduce the Fund's exposure to counterparty risk, the Investment Manager may establish a financial guarantee in favour of the Fund.

**f) Risks associated with temporary purchases and sales of securities:** the use of these transactions and management of their collateral may carry certain specific risks, such as operational risks and custody risk. Use of these transactions may therefore have a negative effect on the Fund's net asset value.

**g) Legal risk:** this is the risk that contracts agreed with counterparties to temporary purchases/sales of securities, or over-the-counter forward financial instruments, may be drafted inappropriately.

**h) Risk associated with the reinvestment of collateral:** the Fund does not intend to reinvest collateral received, but if it does, there would be a risk of the resultant value being lower than the value initially received.

**i) Emerging markets risk:** the operating and supervision conditions of emerging markets may deviate from the standards prevailing on the major international markets, and price variations may be high. These variations may be even greater if the markets are very small, hard to access, or at the start of their development as in the case of frontier markets.

**j) Sustainability risk:** refers to an event or an environmental, social or governance factor that, if it were to occur, could have a significant real or potential impact on the value of investments and, ultimately, on the net asset value of the Fund.

✓ Incorporation of sustainability risk into investment decisions

The fund's investments are exposed to sustainability risks, representing a real or potential threat to maximising long-term risk-adjusted rewards. The Management Company has therefore incorporated the identification and assessment of sustainability risks into its investment decisions and risk management processes, through a three-step procedure:

1) Exclusion: Investments in companies that the Management Company believes do not meet the Fund's sustainability standards are excluded. The Management Company has established an exclusion policy that, amongst other things, provides for company exclusions and tolerance thresholds for business in fields such as controversial weapons, tobacco, adult entertainment, thermal coal production and electricity generation. For more information, please refer to the exclusion policy: [https://www.carmignac.fr/fr\\_FR/responsible-investment/politiques-et-rapports-d-investissement-responsable-4738](https://www.carmignac.fr/fr_FR/responsible-investment/politiques-et-rapports-d-investissement-responsable-4738).

2) Analysis: the Management Company incorporates an ESG analysis alongside a traditional financial analysis to identify sustainability risks from issuers in the investment universe, covering more than 90% of corporate bonds and equities. Carmignac's proprietary research system, START, is used by the Management Company to assess sustainability risks. For more information, please refer to the ESG incorporation policy at [https://www.carmignac.fr/fr\\_FR/responsible-investment/politiques-et-rapports-d-investissement-responsable-4738](https://www.carmignac.fr/fr_FR/responsible-investment/politiques-et-rapports-d-investissement-responsable-4738) and to details of the START system: [https://www.carmignac.fr/fr\\_FR/responsible-investment/en-pratique-4692](https://www.carmignac.fr/fr_FR/responsible-investment/en-pratique-4692).

3) Engagement: The Management Company works with issuers on ESG-related matters to raise awareness and gain a better understanding of sustainability risks to portfolios. This engagement may concern a specific environmental, social or governance matter, a long-term impact, controversial behaviour or proxy voting decisions. For more information, please refer to the engagement policy: [https://www.carmignac.fr/fr\\_FR/responsible-investment/politiques-et-rapports-d-investissement-responsable-4738](https://www.carmignac.fr/fr_FR/responsible-investment/politiques-et-rapports-d-investissement-responsable-4738) and [https://www.carmignac.fr/fr\\_FR/responsible-investment/en-pratique-4692](https://www.carmignac.fr/fr_FR/responsible-investment/en-pratique-4692).  
Potential impact of sustainability risk on the fund's returns.

Sustainability risks can have adverse effects on sustainability in terms of a significant real or potential negative impact on the value of investments and net asset value of the Fund, and ultimately on investors' return on investment.

There are several ways in which the Management Company may monitor and assess the financial significance of sustainability risks on a company's financial returns:

**Environmental:** the management company believes that if a company does not take into account the environmental impact of its business and the production of its goods and services, then it may lose natural capital, incur environmental fines, or suffer lower demand for its goods and services. Where relevant, a company's carbon footprint, water and waste management, and supply chain, are therefore all monitored.

**Social:** The management company believes that social indicators are important in monitoring a company's long-term growth potential and financial stability. These policies on human capital, product safety checks and client data protection are just some of the important practices that are monitored.

**Governance:** The management company believes that poor corporate governance may present a financial risk. Therefore, the independence of the board of directors, the composition and skills of the

executive committee, treatment of minority shareholders, and remuneration, are the key factors studied. Companies' approach to accounting, tax and anti-corruption practices is also checked.

The underlying investments of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.

### **Target subscribers and investor profile**

The Fund is open to all investors and more specifically to investors seeking short-term returns on low-risk investments.

Units of this Fund have not been registered in accordance with the US Securities Act of 1933. They may therefore not be offered or sold, either directly or indirectly on behalf of or for the benefit of a US person, as defined in Regulation S. Furthermore, units of this Fund may not be offered or sold, either directly or indirectly, to US persons and/or to any entities held by one or more US persons as defined by the US Foreign Account Tax Compliance Act (FATCA).

Investors include institutions (including associations, pension funds, paid leave funds and all non-profit organisations), legal entities and natural persons. The fund's investment policy meets the needs of certain company treasurers, institutions subject to tax and high net worth individuals.

The recommended investment period is at least one day.

The appropriate amount to invest in this Fund depends on the personal situation of the investor. To determine this amount, the investor's assets, current and future financial requirements and degree of risk aversion must all be taken into account. Investors are also advised to sufficiently diversify their investments to avoid being exposed to the risks of this fund only.

## Investment policy

### European Central Bank monetary policy in 2022.

With inflation higher than expected, and in place for longer than initially anticipated due to factors such as higher prices for energy and agricultural produce, the main theme of 2022 was the normalisation of monetary policy, which accelerated in the second half of the year.

The European Central Bank (ECB) did not change its key interest rates until June 2022, but expectations of a rise in rates had emerged in early 2022. The normalisation began with a 50 bp hike in July, whereas the ECB had committed to a 25 bp increase in June. According to the press release, “the Governing Council judged that it was appropriate to take a larger first step on its policy rate normalisation path than signalled at its previous meeting.” From August onwards, accelerating inflation prompted the ECB to take a far tougher tone. It raised rates by a record 75 bps in September, taking the deposit rate to 0.75% and ending the era of zero or negative rates. The ECB then made it clear that it intended to continue the tightening cycle, raising its three key rates twice in Q4 (75 bps in October and 50 bps in December). Following the Governing Council meeting on 15 December, the interest rates on the main refinancing operations, the marginal lending facility and the deposit facility were raised to 2.50%, 2.75% and 2.00% respectively. After a cumulative increase of 250 bps in the second half of the year, the ECB's tone has not softened – quite the opposite. Although inflation in the eurozone showed only a limited inflection at the end of the year (at 10.1% in November YoY compared with 10.6% in October and 5.0% at the end of 2021), Christine Lagarde was clear that 50 bp rate rises would continue for some time and repeatedly stated that going from a 75 bp increase in October to a 50 bp increase in December was “not a pivot” and the ECB was “not slowing down”. Furthermore, the various measures announced by euro area governments to limit the consequences of the energy crisis for the most vulnerable households and companies, in effect providing support for growth, are likely to encourage the ECB to tighten its monetary policy further. Despite the downside risks to growth, it is no longer a question of simply normalising monetary policy but of implementing restrictive measures, as the ECB believes that the moderate recession it is anticipating in the coming months will not be enough to bring inflation down and believes it has no choice.

### The fund's investment policy in 2022.

The net assets of the CARMIGNAC COURT TERME FUND increased from EUR 551,214,000 on 31 December 2021 to EUR 969,998,000 at 30 December 2022.

Since the Carmignac Court Terme Fund's resumption in April 2019, the fund's investment policy has consisted of the Fund reconciling the fund's liquidity and average return while upholding Socially Responsible Investment rules.

Amid increases in key rates, the investment strategy pursued for the fund from the second quarter onwards entailed hedging or neutralising the portfolio against rate hikes by purchasing swaps of fixed rate instruments, or by purchasing floating-rate instruments directly.

This strategy helped to lower the portfolio's weighted average maturity (WAM) at the end of the year to between 5 and 10 days. In terms of credit duration, the portfolio's WAL has moved within a range of 50 to 100 days.

In terms of investment, in order to achieve the performance objective (the ESTR), we invested in financial sector securities with a preference for floating-rate instruments with maturities of over six months. This sector has the advantage of issuing securities linked directly to the ESTR, unlike the corporate sector, which is rarely seen at this maturity, and which essentially offers fixed rates. Thus, mechanically, we invested in the corporate sector for shorter periods of one to three months.

For the rest of the portfolio, in order to ensure liquidity, we invested in money market funds and overnight trades. This liquidity allows us to handle redemptions at any time.

The net asset value of CARMIGNAC COURT TERME fell from EUR 3,675.66 on 31 December 2021 to EUR 3,674.85 on 30 December 2022, which represents a net annualised performance of -0.022%. This performance is not an indication of future results. For information, the arithmetic mean of the ESTR over the same period was -0.019%.

## Transparency of securities financing transactions and the reuse of financial instruments pursuant to the SFTR in the fund's currency of account (EUR)

The fund took no part in any trades covered by the SFTR during the year.

## Regulatory information

### Policy for the selection of intermediaries

"In its capacity as management company, Carmignac Gestion selects service providers whose execution policy guarantees the best possible result when executing orders transmitted on behalf of its UCITS or its clients. It also selects service providers to aid in making investment decisions and to execute orders. In both cases, Carmignac Gestion has defined a policy for selecting and evaluating intermediaries according to certain criteria. You can find the updated version of this policy at [www.carmignac.com](http://www.carmignac.com)". You will also find a report on intermediary fees on this website.

### Extra-financial characteristics

As at 30 December 2022, the financial product was classified under Article 6 of the EU SFDR.

In light of the investment policy implemented, the management company confirms that it does not take adverse sustainability impacts into account at the level of the financial product.

### Energy-Climate Law (Art. 29)

The information required under Implementation Decree no. 2021-663 of 27 May 2021 on Article 29 of the Energy-Climate Law is available as an appendix to this report.

### Overall risk calculation method

The fund uses the commitment method to calculate the overall risk to the fund from financial contracts.

### Remuneration policy

Carmignac Gestion SA's remuneration policy is designed to comply with European and national remuneration and governance rules as set out in the UCITS Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 and 2014/91/EU of 23 July 2014, the ESMA guideline of 14 October 2016 (ESMA/2016/575), and the AIFM Directive 2011/61/EU of the European Parliament and of the Council.

It promotes sound and effective risk management without excessive risk taking. In particular, it ties employees to the risks they take to ensure that Identified Staff are fully committed to the Company's long-term performance.

The remuneration policy was approved by the Board of Directors of the management company. The principles of this policy are re-evaluated at least once a year by the remuneration and nominations committee and Board of Directors, and are adjusted to fit the changing regulatory framework. Details of the remuneration policy, including a description of how remuneration and benefits are calculated, as well as information on the remuneration and nominations committee, can be found at [www.carmignac.com](http://www.carmignac.com). A printout of the remuneration policy is available free of charge upon request.

#### VARIABLE PART: DETERMINATION AND APPRAISAL

Variable remuneration depends on both the individual success of the employee and the performance of the Company as a whole.

The variable remuneration budget is determined on the basis of Carmignac Gestion SA's results over the previous financial year, while ensuring that capital remains at a sufficient level. It is then distributed between the various departments according to the assessment of their performance, and within each department according to employees' individual performance appraisals.

The amount of the variable portion allocated to each employee reflects their performance and the achievement of targets set by the Company.

These targets may be quantitative and/or qualitative and are linked to the employee's position. They take into account individual behaviour to avoid short-term risk taking. They give particular consideration to the sustainability of action taken by the employee and its long-term benefits for the company, the employee's personal involvement and the completion of assigned tasks.

#### 2021 FINANCIAL YEAR

The implementation of the remuneration policy for 2021 has been assessed internally and independently to check compliance with the remuneration policies and procedures adopted by Carmignac Gestion's Board of Directors.

#### 2022 FINANCIAL YEAR

The annual report produced by Carmignac Gestion's Board of Directors is available on the Carmignac website ([www.carmignac.com](http://www.carmignac.com)).

2022	
Number of employees	176
Fixed salaries paid in 2022	€13,051,217.29
Total variable remuneration paid in 2022	€37,578,333.26
Total remuneration paid in 2022	€50,629,550.55
> of which risk takers	€37,123,257.99
> of which non-risk takers	€13,506,292.56

### **Quantitative remuneration details – BNP PAM**

Below is the quantitative information on remuneration as required by Article 22 of the AIFM Directive (Directive 2011/61/EU of 8 June 2011) and Article 69-3 of the UCITS V Directive (Directive 2014/91/EU of 23 July 2014), in a format that follows the guidelines of the AFG (Association Française de Gestion)<sup>1</sup>.

### **Cumulative remuneration of BNP PARIBAS ASSET MANAGEMENT France (“BNPP AM France”) staff (Article 22(2)(e) of the AIFM Directive and Article 69(3)(a) of the UCITS V Directive):**

	Number of employees	Total remuneration (EUR k) (fixed + variable)	Of which total variable remuneration (EUR k)
All BNPP AM France staff <sup>2</sup>	978	133,825	50,406

### **Cumulative remuneration of BNPP AM France staff whose actions have a material impact on the risk profile and who are therefore “Identified Staff”<sup>3</sup> (Article 22(2)(f) of the AIFM Directive and Article (69)(3)(b) of the UCITS V directive):**

Business sector	Number of employees	Total remuneration (EUR k)
Identified Staff employed by BNPP AM France:	176	42,857
of which managers of Alternative Investment Funds/UCITS/European mandates	154	34,914

<sup>1</sup> NB: the remuneration amounts shown above do not match accounting data for the year exactly, as they reflect the amounts allocated in May 2022, on the basis of the headcount at the end of the annual variable remuneration period. For example, these amounts include all variable remuneration allocated during this plan, whether deferred or not, and whether employees ultimately stayed with the company or not.

<sup>2</sup> In addition to these staff and the corresponding amounts, there were:

- 5 employees of the Austrian branch, 1 of whom had Identified Staff status, and whose total remuneration and variable remuneration amounted to €916,000 and €370,000 respectively in 2021;
- 23 employees of the German branch, 1 of whom had Identified Staff status, and whose total remuneration and variable remuneration amounted to €5.026 million and €1.867 million respectively in 2021.
- 53 employees of the Italian branch, 2 of whom had Identified Staff status, and whose total remuneration and variable remuneration amounted to €6.171 million and €1.910 million respectively in 2021;
- 74 employees of the Italian branch, 10 of whom had Identified Staff status, and whose total remuneration and variable remuneration amounted to €10.668 million and €2.902 million respectively in 2021.
- 
- 
- 
- 

<sup>3</sup> The list of identified staff is drawn up on the basis of the year-end review.

## **Other information:**

### ➤ **Number of AIF and UCITS under the management of BNPP AM France:**

	<b>Number of funds (31/12/2022)</b>	<b>Assets under management (EUR billion) at 31/12/2022</b>
UCITS	188	79
Alternative Investment Funds	315	45

- In 2022, EUR 6,600 was paid as carried interest to persons employed by BNPP AM France as at 31 December 2022.
- Under the supervision of the remuneration committee of BNP Paribas Asset Management Holding and its Board of Directors, an independent, centralised audit of BNP Paribas Asset Management’s overall remuneration policy, and its implementation during the 2021 financial year, was conducted between June and September 2022. The results of this audit, which covered BNP Paribas Asset Management entities holding an AIFM and/or UCITS licence, were listed as “Satisfactory” (the best of four possible ratings), underlining the soundness of the system in place, particularly at key stages: identification of identified staff, correlation between performance and pay, application of mandatory deferral rules, implementation of indexing and deferral mechanisms. A recommendation (not classed as an alert) was issued in 2022, as the documentation and controls on the selection of index baskets for members of the management teams who do not directly manage portfolios themselves required improvement in some cases.
- Further information on the calculation of variable remuneration on these deferred compensation instruments is provided in the description of the remuneration policy, published on the company’s website.

## **Substantial changes during the year**

BNP S.A. became the depositary for the portfolio on 1 October 2022 following an intra-group merger.

# NOTES TO THE FINANCIAL STATEMENTS OF CARMIGNAC COURT TERME

## Accounting methods and rules

The annual financial statements are drawn up in the form required by ANC Regulation 2014-01, as amended.

The general principles of accounting apply:

- a true and fair view, comparability, going concern,
- lawfulness and fairness,
- prudence,
- consistent practice from one financial year to the next.

Income from fixed income securities is recorded on the basis of accrued interest.

Purchases and sales of securities are recorded exclusive of costs.

The accounting currency of the portfolio is the euro.

There are 12 months in the financial year.

### Asset valuation rules

Financial instruments are recorded in the financial statements using the historical cost method and are entered on the balance sheet at their current value as determined by the last-known market value or, where a market does not exist, by any external means or by using financial models.

Differences between the current values used to calculate the net asset value and the historical costs of transferable securities when first included in the portfolio are recorded in “valuation differentials” accounts.

Securities that are not denominated in the currency of the portfolio are valued in accordance with the principle described below; the valuation is then converted into the currency of the portfolio on the basis of the exchange rate prevailing on the valuation day.

#### DEPOSITS:

Deposits with a residual maturity of less than or equal to three months are valued using the straight-line method.

#### EQUITIES, BONDS AND OTHER SECURITIES TRADED ON A REGULATED OR SIMILAR MARKET:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the last market price of the day.

Bonds and other similar securities are valued at the closing price supplied by various financial service providers. Interest accrued on bonds and other similar securities is calculated up to the date of the net asset value.

#### EQUITIES, BONDS AND OTHER SECURITIES NOT TRADED ON A REGULATED OR SIMILAR MARKET:

Securities not traded on a regulated market are valued by the management company using methods based on the market value and the yield, while taking account of recent prices observed for significant transactions.

#### TRANSFERABLE DEBT SECURITIES:

If it is not possible to value at market price or market data is of insufficient quality, the money market fund's assets are valued prudently using a model-based approach. The delegated financial manager regularly checks the relevance of prices determined in this way, by comparing the calculated prices with the processed transfer prices.

#### **FUNDS HELD:**

Units or shares of UCIs will be valued at their last-known net asset value.

#### **TEMPORARY TRANSACTIONS ON SECURITIES:**

Securities received under repurchase agreements are recorded as an asset under the heading "Receivables on securities received under a repurchase agreement (*pension*)" at the contract amount, plus any accrued interest receivable.

Securities transferred under a repurchase agreement are recorded as securities purchased at their current value. The payables on securities transferred under a repurchase agreement are recorded as securities sold at the value determined in the contract, plus any accrued interest payable.

Securities lent are valued at their current value and are recorded as an asset under the heading "Receivables on securities lent" at their current value, plus any accrued interest receivable.

Securities borrowed are recorded as an asset under the heading "Securities borrowed" at the contract amount and as a liability under the heading "Payables on securities borrowed" at the contract amount, plus any accrued interest payable.

#### **FORWARD FINANCIAL INSTRUMENTS:**

##### *Forward financial instruments traded on a regulated or similar market:*

Forward financial instruments traded on regulated markets are valued at the settlement price of that day.

##### *Forward financial instruments not traded on a regulated or similar market:*

##### **Swaps:**

Interest rate and/or currency swaps are valued at their market value by discounting future interest payments at the interest rate and/or currency exchange rate prevailing on the market. This price is adjusted to reflect issuer risk.

Index swaps are valued using an actuarial method on the basis of a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the terms and conditions determined by the management company.

##### **Off-balance sheet commitments:**

Futures contracts are recorded at their market value as off-balance sheet commitments on the basis of the price used in the portfolio.

Options are converted into the underlying equivalent.

Swap commitments are recorded at their nominal value or, where there is no nominal value, at an equivalent amount.

*Financial instruments:*

## Management fees

Management fees and operating costs cover all the charges relating to the UCI: investment, administrative, accounting, custody, distribution, audit fees, etc.

These fees are recorded in the UCI's income statement.

Management fees do not include transaction fees. Please refer to the prospectus for further details on the charges actually invoiced to the UCI.

They are recorded on a pro-rata basis each time the net asset value is calculated.

The combined total of these fees respects the limit of the net assets, as specified in the prospectus or fund rules: FR0010149161 – A EUR Acc units: Maximum of 0.75% inclusive of tax.

## Allocation of distributable income

### DEFINITION OF DISTRIBUTABLE INCOME

Distributable income is made up of:

#### NET INCOME:

The net income for the financial year is equal to the amount of interest, arrears, premiums and prizes, dividends, director's fees and any other income relating to the securities constituting the portfolio, plus income generated by temporary cash holdings and minus the amount of management fees and interest charges on loans. This is increased by retained earnings, plus or minus the balance of the income equalisation accounts.

#### CAPITAL GAINS AND LOSSES:

Realised capital gains, net of fees, minus realised capital losses, net of fees, recognised during the financial year, plus net capital gains of a similar nature recognised during previous financial years and which have not been distributed or accumulated, plus or minus the balance of the capital gains equalisation account.

#### ALLOCATION OF DISTRIBUTABLE INCOME:

Unit(s)	Allocation of net income	Allocation of net realised capital gains or losses
A EUR Acc units	Accumulation	Accumulation

# ARTICLE 29 REPORT – CARMIGNAC COURT TERME

As part of the financial management of Carmignac Court Terme, Carmignac Gestion relies on the expertise of BNP Paribas Asset Management; the main pillars of its sustainable finance strategy are summarised in the BNP Paribas Asset Management Article 29 report (report at entity level). Carmignac Gestion also specifies the main pillars of its sustainable finance strategy in its Article 29 report (report at entity level), available on its website.

## I. Strategy for alignment with the Paris Agreement objectives

This fund's investment strategy does not incorporate its own quantitative target for alignment with the international objectives for limiting global warming provided for by the Paris Agreement.

However, BNP Paribas Asset Management has made commitments in favour of the Paris Agreement embodied in the Net Zero Roadmap published after the "Net Zero Asset Manager" initiative was signed. This roadmap includes a description of our commitment, our quantified targets and the associated strategy. The assets held by this fund (with the exception of any holdings of sovereign debt, private assets and indirect exposures) fall within the scope of the assets covered by BNP Paribas Asset Management's commitment.

For more details on BNP Paribas Asset Management's strategy for alignment with the Paris Agreement, see BNP Paribas Asset Management's Article 29 report (entity level report) or our Net Zero roadmap.

1. *Indirect exposures correspond to investments in funds outside the scope of application of our "Net Zero" commitment and derivatives.*

## II. Strategy for alignment with long-term biodiversity objectives

This fund's investment strategy does not include a quantitative target for alignment with the long-term biodiversity objectives defined in the Convention on Biological Diversity of 5 June 1992.

However, BNP Paribas Asset Management drew up a biodiversity roadmap in 2021 to develop methodological tools to better understand and quantify the biodiversity risks to which we are exposed and the impacts of our investments on biodiversity. In 2022, BNP Paribas Asset Management published a report on the initial results of using Iceberg Data Lab's Corporate Biodiversity Footprint; we continue to work on this methodology in order to quantify the biodiversity risks and impacts of our funds.

## III. Consideration of ESG criteria in risk management

The report prepared in relation to Article 29 of the French Energy-Climate Law by BNP Paribas Asset Management for the 2022 financial year will include additional information on the consideration of ESG criteria in risk management, in accordance with Article D-533-16-1 of the French Monetary and Financial Code, and will be available on the management company's website.
