SFDR Fund Classification**:

Article 8

Carmignac Portfolio Global Bond is an international fixed income fund that applies interest rate, credit and currency strategies depending on the global macroeconomic cycle. Its dynamic and flexible approach enables the Fund to apply a conviction-driven and non-benchmarked allocation strategy and thus fully exploit the many performance drivers available in the fixed income universe. The Fund aims to outperform its reference indicator⁽¹⁾ over a recommended minimum investment horizon of three years.

KEY POINTS

Access to a wide range of performance drivers: the Fund implements interest rate, credit and currencies strategies in both developed and emerging markets.

A conviction-driven, non-benchmarked philosophy: portfolio construction is the result of Fund Managers' views and extensive market analysis with no bias to any benchmark.

A truly flexible and opportunistic approach: the wide modified duration range (from -4 to +10) offers the Fund a large degree of latitude, which allows it to swiftly adapt to changing scenarios.

A disciplined risk management integrated into the investment process, including both financial and extra-financial criteria.

A GLOBAL AND FLEXIBLE INVESTMENT PROCESS

MACROECONOMIC SCENARIO

Identification of structural trends and key investment themes in fixed income markets.

ASSET ALLOCATION

Definition of performance drivers and interest rate, credit and currency strategies depending on different market cycles.

PORTFOLIO CONSTRUCTION

Selection of securities on the basis of top-down and bottom-up strategies.

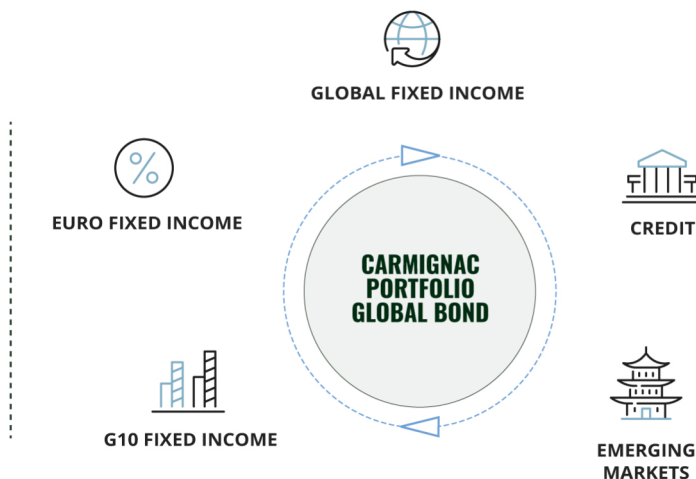

RISK MANAGEMENT

Permanent control over the portfolio's risk/reward profile in order to optimise performance while mitigating downside risk.

GLOBAL FIXED INCOME EXPERTISE

Our Fund is able to draw on the entire investment team's expertise as well as the complementary know-how offered by each of its members in their respective fields spanning every segment of the fixed income universe: global fixed income, European fixed income, credit, emerging markets...

Our Fund managers and analysts cover specific asset classes and investment strategies and are therefore able to offer in-depth expertise across the whole fixed income spectrum.

MAIN RISKS OF THE FUND

CREDIT: Credit risk is the risk that the issuer may default.

INTEREST RATE: Interest rate risk results in a decline in the net asset value in the event of changes in interest rates.

CURRENCY: Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments.

DISCRETIONARY MANAGEMENT: Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

The Fund presents a risk of loss of capital.

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

Bottom up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

Modified duration: A bond's modified duration measures the risk attached to a given change in the interest rate. Modified duration of +2 means that for an instantaneous 1% rate increase, the portfolio's value would drop by 2%.

Non-benchmarked: Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

Top-down investing: An investment strategy which finds the best sectors or industries to invest in, based on analysis of the corporate sector as a whole and general economic trends (as opposed to bottom up investing).
