Length

 3 minute(s) read

We are honoured to announce that Carmignac Portfolio Grandchildren has won the **Globes de la Gestion 2023** award in the "Thematic Equity - Social" category.

Carmignac Portfolio Grandchildren invests in quality companies in developed markets. Across a structured and quantifiable investment process, the Fund identifies companies that reinvest their earnings to develop their businesses, allowing them to remain profitable over time. By adopting this long-term vision, the Fund seeks to **build a legacy** not only for the investors themselves but one that can be passed on from one generation to the next. With this objective of transmission through the generations, we are convinced that, as investors, it is our responsibility to create value for our clients through a sustainable approach, and thus preserve our world for future generations.

The **Globes de la Gestion** reward funds that have been able to create outperformance over the long term while also withstanding significant market downturns in recent years.

Methodology

Quantalys and Gestion de Fortune establish a ranking of funds based on two important criteria: the maximum loss and the volatility during market downturns. To select these funds, they examine the Sortino index over a period of 3 years¹. This measures the excess return of a fund compared to a risk-free investment by evaluating only downside volatility. In other words, this means that volatility (the amplitude of variations in a value around its average) is only a problem on the downside.

In addition, in order to highlight funds that have shown resilience in the event of a crash, only funds whose maximum loss over the past 3 years is less than the average maximum loss of their respective category are included in the ranking.

Main risk of the Fund

EQUITY: The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization.

CURRENCY: Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments.

DISCRETIONARY MANAGEMENT: Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

The Fund presents a risk of loss of capital.
