A flexible investment solution for greater diversification

Characterised by its flexible approach, Carmignac Portfolio Unconstrained Credit aims to offer an optimal risk/return profile for investors seeking to take advantage of the global credit cycle. Its opportunistic and active philosophy gives the Fund the ability to benefit from a wide investment universe, and to swiftly adapt to changing scenarios in order to capture attractive returns. The Fund aims to outperform its Reference Indicator¹ over a minimum investment period of two years.

Benefit from an unconstrained investment approach

The portfolio follows a conviction-driven and non-benchmarked approach, based on the Fund Managers' views and market analysis. Combining with macroeconomic analysis and a rigorous bottom-up selection, we seek to optimise risk management.

The Fund's unconstrained nature derives mostly from its flexible allocation to its key performance drivers with no restriction in terms of sector or geography².
